MEMORANDUM

To: File
From: Erik Nordstrom
Date: March 25, 1998
Re: Office Int. w/ Ex. Shackelford re. 6216 Final Office Action

On March 25, 1998, Wednesday afternoon, I spoke with Ex. Shackelford in a telephone office interview regarding the final office action dated 1/5/98 for the 6216 application. I had faxed to her a set of proposed claims, which discussed in connection with UK '034 to Anderson.

We agreed that a patentable claim could include a brase where (1) the brace includes a forearm engaging surface that is directed in the opposite direction as the projection of the handle, or (2) a brace with a forearm engaging portion that is not in the same plane as the frame.

Should not use language that is dependant on the forearm or its position, etc. Can use language such as "downwardly" if initially referenced to something (e.g., perpendicular to longitudinal dimension of frame).

We agreed that (1) Applicant would cancel claims 1-4 so that claims 5-8 may issue immediately, and (2) Applicant would file a continuation of 6216 to continue prosecuting claims 1-4.
